

# HONGFA GCK WITHDRAWABLE LOW VOLTAGE SWITCHGEAR

GCL Switchgear Table 1 Special Features

## Special Features

GCK withdrawable low voltage switchgear is applied for the three-phases four-wires and three-phases five-wires power system that the rated frequency is 3-phases AC 50Hz/60Hz and the rated current below 5000A. This product is used as the power acceptance and distribution for power consumers and power systems such as power plants, substations, industrial and mining enterprises, hotels buildings, airports, wharves and so on.

Adopting the standard modular block design, this product can be assembled respectively into different standard modular blocks of protection, operation, conversion, control, regulation, determination and indicator. In accordance with the users' need, they can assemble the frame structures and drawer units under in different proposals.

The cabinet is assembled by 25mm-module C profiles. Its advantages of structural versatility and flexible assembly can meet the application requirements of various structural forms and protection degrees.

All structure parts in the cabinet with galvanization passivation treatment. Door surfaces of the cabinet are covered electrostatic duster, which enhances the mechanical strength and reliable insulation protection.
